PROFESSIONAL SUMMARY

UX Designer and Researcher with 3+ years of experience across UX research, interaction design, and business analysis. Holds a Master of Information Technology (University of Melbourne), specialising in Human-Computer Interaction, UX design, and XR development. Proven ability to lead end-to-end research from 7 interviews and 24 surveys through to prototyping and validated usability outcomes, across mixed reality and digital platform projects. Experienced in translating user needs and business requirements into intuitive, evidence-based design solutions. Full Australian work rights. Based in Melbourne and immediately available.

KEY SKILLS

UX Research: User interviews, usability testing, think-aloud protocols, thematic analysis, A/B testing, surveys, design thinking, journey mapping, information architecture

UX & UI Design: Figma, ShapeXR, wireframing, prototyping, interaction design, user flows, accessibility evaluation

XR Development: Unity, Meta XR SDK, ShapeXR, gesture-based interaction, mixed reality prototyping

Business Analysis: Requirements gathering, functional specifications, stakeholder management, process documentation, analytical reporting

Technical: JavaScript, Python, Java, C#, SQL, Arduino, WordPress, Jira, Microsoft 365

UX PROJECTS

UX Researcher & XR Developer | XRTV — Extended Reality Television

2023 – 2025

Research Lab Project · University of Melbourne · Tools: Figma, Unity, Meta XR SDK, ShapeXR, ESP32, Arduino

- Led end-to-end UX research for a Mixed Reality learning system; conducted 7 interviews and 24 surveys using design thinking methodology to define user needs and drive iterative interaction design across physical and gesture-based controls.
- Ran 9+ usability testing and evaluation rounds, with results showing 75%+ of participants found physical controls more familiar and engaging, directly validating design decisions through structured, evidence-based evaluation.
- Evaluated accessibility and learning outcomes via mixed-method testing, demonstrating that interactive XR experiences produced measurably higher comprehension compared to static content formats such as text and video.

UX/UI Designer & Researcher | StudentSwap — Student Items Exchange Platform

2023 – 2025

Team of 4–6 · University of Melbourne · Tools: Figma, User Research, Prototyping

- Led mixed-method UX research across a team of 4–6, conducting interviews, think-aloud sessions, and post-task walkthroughs with 12 university students, applying thematic analysis to surface trust, navigation, and information architecture as critical pain points.
- Designed trust-focused marketplace flows with student verification and profile systems using Figma; post-test surveys showed user-reported platform safety scores improved from 3.1 to 4.4 out of 5.
- Ran 2–3 prototype iterations using an agile, feedback-driven approach, achieving a 30% improvement in task completion rates for item listing and exchange workflows.

EXPERIENCE

Project Assistant (Business Analyst) | Catmango Co., Ltd

Nov 2021 – Jun 2023 · 1 yr 8 mos

Nonthaburi, Thailand · Hybrid

- Applied UX discovery methodology to gather and document business and user requirements for a pharmacy ERP system, leading stakeholder interviews and workshops across 3–5 departments over 18 months, translating operational needs into functional specifications.
- Produced 10+ analytical reports and project improvement roadmaps that directly informed senior leadership decisions, drawing on cross-functional stakeholder input across the organisation.
- Coordinated project milestones in an agile-adjacent environment, managing documentation and ensuring alignment between business goals and technical delivery outcomes.

IT Support & Web Developer | Westgate Medicare Co., Ltd

Nov 2020 – Oct 2021 · 1 yr

Nonthaburi, Thailand · On-site

- Designed, developed, and maintained the organisation's WordPress website for 20–50 staff, applying user-centred design and information architecture principles to improve content accessibility and online presence.
- Provided Level 1/2 IT support across the organisation, developing strong empathy for end-user workflows and pain points, a foundation directly transferable to UX research practice.

Software Development Intern | University of South-Eastern Norway

Jun 2019 – Aug 2019 · 3 mos

Kongsberg, Norway · On-site

- Developed a Python-based control system for a fleet of 3–5 autonomous robots within a 4–6 person international research team, designing and testing directional logic and interaction models applicable to interaction design thinking.

EDUCATION

Master of Information Technology — Human-Computer Interaction, UX Design, XR Development

University of Melbourne, Victoria, Australia · 2023 – 2025

Bachelor of Science, Information and Communication Technology

Mahidol University, Nakhon Pathom, Thailand · 2016 – 2020
